7" full-duplex hands-free connected video door entry system for VX2300 systems

 **VX2300**

**7" TFT LCD monitor**  
with high resolution capacitive touch screen and OSD menus

**Full-duplex hands free**

**4 freely configurable buttons**

**Thermostat feature**

**Intercommunication function**  
through GUI

**Surface or tabletop installation**

The 6789 videophone is a full-duplex hands-free device with 7" touchscreen TFT LCD monitor, a look that conveys elegance and cutting-edge technology and that blends in with any decor thanks to the low profile footprint for surface installation. The video monitor combines design, simplicity with advanced functionality that includes third party integration.

Memory board opt.	Yes, standard
Programmings	Service, Privacy duration, Number of rings, Intercommunicating call, Melody, Door panels phonebook
Interfaces	WiFi standard dongle connection
CCTV compatibility	Yes, IP-based with RTSP
Sensors	High quality integrated temperature and humidity sensors (Smart chronothermostat)
Inputs	2 programmable active low inputs
Outputs	2 programmable dry contacts
Power supply	12Vdc - 650mA or supplied by BUS
Mounting	Surface or tabletop (requires 67931)
Finishes	Satin white

<sup>1</sup> Some buttons are used for multiple functions.

### Accessories

**67931**  
Desktop kit

### Videx CloudNected client

Videx CloudNected Client is a cross-platform application for smartphones and tablets that allows the user to interface to Videx IP products easily.

Register your account in the app and connect Videx IP devices by simply acquiring the device's QR code.

You can receive calls coming from your door panel wherever you are, without needing to keep the application open.

Call the connected devices and operate gates and doors even when you are away from home.

Note: this application does not replace the use of traditional monitors; the application performances are subject to the energy saving mode of the smartphone and to connectivity.
